

Table of Contents

Preface to the Fourth Edition	xix
Acknowledgments	xxi
Abbreviations	xxiii
Introduction	1
Section I Brewing Beer Kits	
Chapter 1 – Brewing Your First Batch of Beer	5
What Do I Do?	5
Before We Get Started: The Top Five Priorities for Brewing Great Beer	6
Brew Day	7
Equipment Needed to Brew Today	7
Preparation (30 Minutes)	9
Making Wort (1 Hour)	11
Fermentation Week(s)	19
Bottling Day	20
Serving Your Beer	22
But Wait! There’s More!	23
Chapter 2 – Cleaning and Sanitizing	25
Be Organized, Be Prepared	26
Brewing Priority Number 1—Good Sanitation	28
Cleaning Products	30
Percarbonates	30
Detergents	30
Automatic Dishwashers	30
Bleach	31
Oven Cleaner	31
Cleaning Suggestions	31
Cleaning Plastic	31
Cleaning Glass	32

Cleaning Copper	32
Cleaning Brass.....	33
Cleaning Stainless Steel and Aluminum.....	33
Beerstone Removal.....	34
Sanitizing Products.....	34
Chemical Sanitizers.....	35
Acidic Anionic Surfactants	35
Iodophor	35
Peracetic (Peroxyacetic) Acid	36
Chlorine Dioxide.....	36
Bleach	36
Heat Sanitizing	36
Dishwashers.....	37
Heat Sterilizing	37
Oven.....	37
Autoclaves and Pressure Cookers.....	38
Final Thoughts on Cleaning and Sanitizing.....	38
Chapter 3 – Malt and Malt Extract.....	43
A Brief Discussion of Barley and Malting	43
Malt Extract Production	45
Summary.....	46
Chapter 4 – Brewing with Beer Kits and Extracts.....	49
Choosing a Good Kit.....	49
Shopping for Extract.....	51
How Much Extract to Use	51
Mass Gravity Volume Equation	52
Converting All-Grain (Mashing) Recipes to Extract	53
Gravity versus Fermentability.....	55
Steeping Specialty Grains.....	56
Typical Steeping Yield.....	56
Steeping Temperature.....	58
Full Boil versus Partial Boil.....	59
Summary.....	60
Chapter 5 – Hops.....	63
What Are They?.....	63
Hop Bitterness.....	64
Hop Aroma and Flavor.....	66
Hop Variety Categories	68
Using Hops.....	70
Mash Hopping	70
First Wort Hopping.....	70

Bittering.....	70
Flavoring.....	71
Finishing, Hop Bursting, and Hop Steeping.....	71
Dry Hopping.....	72
Hop Forms—Pellets, Plugs, and Whole Hops.....	73
How to Measure Hops.....	75
Hop Utilization and (International) Bittering Units.....	75
Calculating Hop Bittering Units.....	77
Hop Utilization Equation Details.....	80
Bittering Units Nomograph for Hop Additions.....	80
Chapter 6 – Yeast and Fermentation.....	85
How Yeast Work.....	86
Defining Fermentation.....	88
Adaptation (Lag) Phase.....	90
High-Growth Phase.....	91
Maturation Phase.....	92
Cold Conditioning (Lagering).....	94
Building a Better Fermentation.....	95
Oxygen and Aeration.....	96
Free Amino Nitrogen.....	98
Essential Minerals.....	99
Nutritional Supplements.....	99
Open versus Closed Fermentation.....	100
Basic Procedure for a Closed Fermentation.....	101
Basic Procedure for Open Fermentation.....	101
Chapter 7 – Yeast Management.....	105
Yeast Types.....	106
Characteristic Yeast Strains.....	106
Ale Yeasts.....	108
Lager Yeasts.....	110
Hybrid Yeasts.....	110
What Is the Pitching Rate and Why Does It Matter?.....	111
Pitching Rates and Beer Styles.....	112
Preparing Yeast and Yeast Starters.....	117
Rehydrating Dry Yeast.....	117
Propagating Yeast with a Starter.....	118
Making a Yeast Starter.....	120
When Is My Yeast Starter Ready to Pitch?.....	123
Using Yeast from Commercial Beers.....	123
Support Your Local Craft Brewery.....	124
Simple Yeast Ranching.....	124
Summary.....	126

Chapter 8 – Water for Extract Brewing	129
Understanding Your Source Water	129
Brewing Water Dechlorination Treatments	130
Brewing Water and the Water Quality Report	131
Adding Brewing Salts to Season Your Beer	134
IPA Example for Adding Salts.....	135
Oktoberfest Example for Adding Salts	136
Summary	137
Chapter 9 – Brewing with a Full-Volume Boil	139
The Recipe	140
Equipment Needed	140
Kettles.....	140
Burners.....	141
Chillers	142
Fermentors	143
Brew Day	144
Preparation	144
The Hot Break	145
Hop Additions	146
Kettle Finings.....	146
Hop Steeping (a.k.a. Whirlpool) Addition.....	147
Chilling the Wort	147
Transferring from Kettle to Fermentor.....	148
Aerate the Chilled Wort and Pitch the Yeast	148
Conducting Your Fermentation—Quick Review	149
Chapter 10 – Priming, Bottling, and Kegging	153
When to Bottle	153
Bottle Cleaning	154
Priming	155
Residual CO ₂ , Temperature, and Pressure.....	156
Making the Priming Solution.....	158
Bottling Your Beer	162
Bottle Filling.....	162
Storage.....	163
Drinking Your First Homebrew	163
Kegging Your Beer	164
Reconditioning a Used Keg.....	164
Keg Carbonation	165
Serving from the Keg.....	167
Counter-Pressure Filling.....	167
Kegging versus Cask and Bottle Conditioning	168
Final Thoughts	168

Chapter 11 – How to Brew Lager Beer	171
Lager Fermentation	171
Lower Temperatures Mean Longer Times	172
Pitching and Fermenting with Lager Yeast	173
Controlling the Fermentation Temperature.....	174
Priming and Bottling Lager	177
Fermentation Off-Flavors in Lager	177
Diacetyl and 2,3-Pentanedione	177
Dimethyl Sulfide.....	177
Acetaldehyde.....	178
Fusel Alcohols	178
Esters.....	178
Minimizing Off-Flavors in Lager	178
Brewing American Lager	178
Chapter 12 – Brewing Strong Beers	181
Creating Higher Gravity.....	182
Pitching Rates for High-Gravity Brewing	183
Yeast Selection.....	184
Scaling Your Recipes	184
Wort Aeration.....	185
Wort Additions.....	186
Summary.....	186
Chapter 13 – Brewing with Fruits, Vegetables, and Spices	191
Brewing with Fruit	191
Estimating Quantities and Gravity Contributions	193
Tips for Brewing Fruit Beers.....	194
Brewing with Vegetables	196
Brewing with Spices	199
Chapter 14 – Brewing Sour Beers	205
A Note on Equipment.....	205
The Bugs (<i>Los Bichos</i>)	206
<i>Lactobacillus</i>	206
<i>Pediococcus</i>	207
<i>Brettanomyces</i>	208
Microorganisms from Other Sources	208
Making a Wild Inoculation Wort	209
Culturing Lactobacilli from Malt.....	209
Brewing Sour Beers	210
Kettle Souring.....	211

Section II All-Grain Brewing

Chapter 15 – Understanding Malted Barley and Adjuncts	221
What is Barley and Why Do We Malt It?	221
Malt Flavor Development.....	225
Common Malt Types and Usages	228
Base Malts	228
Kilned Base Malts.....	229
Stewed Malts.....	229
Roasted Malts	230
Other Grains and Adjuncts	232
How to Read a Malt Analysis Sheet.....	232
Percent Extract–Fine Grind, Dry Basis.....	233
Percent Extract–Coarse Grind, As-Is and Dry Basis.....	234
Fine/Coarse Difference	234
Hot Water Extract	234
Color.....	234
Size.....	235
Protein.....	235
Soluble-to-Total Protein Ratio.....	235
Diastatic Power	236
Summary.....	236
Chapter 16 – How the Mash Works	239
Mashing in a Nutshell.....	239
An Allegory of a Mash	240
Defining the Mash.....	241
Acid Rest.....	242
Doughing-In.....	243
Beta-Glucanase Rest	243
Protein Rest and Modification	244
Starch Conversion, or Saccharification, Rest.....	246
Diastatic Enzymes	247
Enzyme Thermostability in the Mash	248
Mash-Out	252
Other Factors Affecting Starch Conversion	252
Mash pH.....	252
Degree of Crush.....	253
Water-to-Grist Ratio	254
Mash Time	255
Summary.....	256
Chapter 17 – The Methods of Mashing	259
Overview of the Grain Brewing Process.....	260
Single Temperature Infusion	262
Multi-Rest Mashing	263

Heating the Mash.....	264
Choosing a Multi-Rest Mash Schedule.....	264
Infusion Calculations	265
Dry Grain Infusion Calculations.....	268
Single Infusion Example.....	268
Wet Grain Infusion Calculations.....	269
Multiple Rest Infusion Example.....	270
Decoction Mashing.....	271
Decoction Calculations.....	274
Adjunct Mashing Procedure.....	275
Conducting a Cereal Mash.....	276
Summary.....	277
Chapter 18 – Extraction and Yield: Or What to Expect from Your Mash.....	279
Malt Analysis Sheet—a Review.....	280
Percent Extract—Fine Grind, As-Is and Dry Basis.....	280
Converting Percent Extract to PPG or PKL.....	280
Hot Water Extract.....	280
Crush and Extract Efficiency.....	281
Yields between Different Crushes.....	281
Water-to-Grist Ratio and Initial Wort Gravity.....	285
Extract Efficiency and Typical Yield.....	287
Planning Malt Quantities for a Recipe.....	290
Using PPG to Calculate Malt Quantities.....	290
Using HWE or PKL to Calculate Malt Quantities.....	291
Using Degrees Plato to Calculate Malt Quantities.....	293
Summary.....	295
Chapter 19 – Getting the Wort Out (Lautering).....	297
The Lautering Process.....	297
Recirculation.....	297
First Runnings.....	298
Sparging for the Second Runnings.....	298
Methods of Sparging.....	299
Continuous Sparging.....	299
Batch Sparging.....	299
Parti-Gyle.....	300
No-Sparge.....	300
Brew-in-a-Bag.....	300
Rinsing versus Draining.....	301
Efficiencies of Sparging Methods.....	302
Continuous Sparging Efficiency.....	303
Batch Sparging Efficiency.....	303
No-Sparge Efficiency.....	305
Brew-in-a-Bag Efficiency.....	306

Chapter 20 – Brewing Your First All-Grain Batch	315
Mash and Lauter Tun or Brew-in-a-Bag?	316
Additional Equipment Needed.....	316
Suggested Recipe.....	317
The MLT Method.....	319
Starting the Mash	319
Monitoring the Mash.....	323
Conducting the Lauter.....	323
The BIAB Method.....	325
Starting the Mash	325
Monitoring the Mash.....	327
Lautering—BIAB-style	328
Chapter 21 – Residual Alkalinity, Malt Acidity, and Mash pH: Or, Everything You Ever Wanted to Know about Mash pH but Were Afraid to Ask.....	331
Beer and Brewing is Food and Cooking.....	332
Know Your Water Source—a Review.....	333
Calcium	335
Magnesium	336
Total Alkalinity as CaCO ₃	337
Sulfate	337
Chloride	338
Sodium	338
Water pH.....	338
Residual Alkalinity is the Cornerstone of Mash pH	338
What Does the Mash pH Do?.....	340
Optimum Mash pH.....	340
Controlling Mash pH.....	342
Adjusting Residual Alkalinity	343
Adjusting Residual Alkalinity with Salt Additions	343
Reducing Alkalinity with Acid	346
Pre-Boiling to Reduce Alkalinity.....	346
Mash pH is Water Chemistry plus Malt Chemistry	349
Sparge Water Adjustment.....	351
The Mash pH sets up the Beer pH.....	352
Beer pH Controls Beer Flavor	353
Chapter 22 – Adjusting Water for Style: Famous Brewing Waters and Their Beers..	357
The Dogma of Virgin Water.....	359
Using Minerals to Accentuate Flavor.....	361
Sulfate-to-Chloride Ratio	361
Total Dissolved Solids.....	362
The Brew Cube	363
Adjusting Water for Style	364
Brewing Yourtown Pale Ale	365

Brewing Yourtown Stout.....	368
Brewing Yourtown Pilsener.....	370
Summary	371

Section III Recipes, Experimenting, and Troubleshooting

Chapter 23 – Some of My Favorite Beer Styles and Recipes	375
A Description of Style	376
Notes on Recipes	377
Batch Size and Boil Gravity	377
Hop Schedules	377
Extract and Steeping Grain Version	377
All-Grain Version.....	378
Mash Schedule	378
Recommended Water Profile	378
Yeast Strain and Pitching Rate	379
THE ALE STYLES	379
Wheat Beer	379
Pale Ale.....	385
Blonde Ale.....	395
Amber Ale.....	396
India Pale Ale (IPA)	397
American Strong Ale.....	406
Brown Ale	407
Porter.....	409
Stout	411
Barleywine.....	414
THE LAGER STYLES	415
Pilsener	415
Munich Helles	417
Dortmunder Export (Helles Exportbier).....	418
Classic American Pilsner.....	419
Bock.....	421
Vienna	422
Oktoberfest	424
Summary	425
Chapter 24 – Developing Your Own Recipes	427
Recipe Basics	428
SMASH and the Single Beer	429
Increasing the Body	430
Changing Flavors	431
Sugars Used in Brewing	432
Pure Glucose	433
High-Maltose Syrups and Solids.....	433
Sucrose-Type Sugars	434

Maple Syrup	435
Honey.....	435
Toasting Your Own Malt.....	437
Discretion Is the Better Part of Flavor	438
Chapter 25 – Is My Beer Ruined?	441
Common Problems with Fermentation.....	442
Problem: I added the yeast two days ago and nothing is happening	442
Problem: I added the yeast yesterday and it bubbled all day, but it's slowing down or has stopped today.....	443
Problem: The last batch (did that) but this batch is (doing this).....	443
Problem: The airlock is clogged with gunk	443
Problem: White/brown/green stuff is floating/growing/moving	444
Problem: It smells like vinegar	444
Problem: It smells like extra-butter microwave popcorn	445
Problem: It smells funky, like cloves or a barnyard	445
Problem: It smells rotten, or like rotten eggs	445
Problem: It's been one or two weeks and it's still bubbling	446
Problem: The fermentation seems to have stopped but the hydrometer reads high.....	446
Common Problems After Fermentation	447
Problem: It won't carbonate	447
Problem: The bottles are overcarbonated.....	447
Problem: The (finished) beer is hazy or cloudy.....	448
Common Off-Flavors and Aromas.....	449
Acetaldehyde.....	449
Alcoholic	450
Astringency	450
Cidery.....	451
Diacetyl	451
Dimethyl Sulfide / Cooked Vegetable Flavors	452
Ester / Fruity	453
Grassy	454
Husky / Grainy	454
Medicinal.....	454
Meaty.....	455
Metallic.....	455
Moldy.....	455
Oxidized.....	455
Soapy	456
Solventlike	456
Skunky.....	456
Sweaty / Goaty.....	456
Yeastlike	457

Section IV Appendices

Appendix A: Using Hydrometers and Refractometers	461
Using Hydrometers.....	461
Using Refractometers	462
Appendix B: Beer Color	467
The Basis of Color Rating	468
Other Factors Determining Color	471
Estimating Beer Color	472
Summary.....	473
Appendix C: Beer Clarity	477
What Is Beer Haze?	478
Why Do We Care about Beer Haze?	478
Fixing Haze in the Recipe	479
Fixing Haze with Clarifiers	480
Irish Moss.....	480
Isinglass	481
Gelatin	481
Polyvinylpolypyrrolidone / Polyclar®.....	482
Silica Gel.....	482
Proline-Specific Enzymes.....	482
Summary.....	483
Appendix D: Building Wort Chillers	485
Immersion Chillers	486
Counterflow Chillers.....	488
Assembling the Chiller	490
Plate Chillers.....	492
Appendix E: Lauter Tun Design for Draining	495
Choosing A Cooler	496
Rinsing versus Draining—a Recap.....	497
Siphon or Bulkhead Fitting?	498
False Bottom, Pipe Manifold, or Screen?.....	500
False Bottoms	500
Manifolds	501
Stainless Steel Screens and Braids.....	501
Building a Copper Pipe Manifold.....	502
Building a Stainless Steel Braided Ring.....	502
Design Examples	505
Design Option 1—Cylindrical Cooler with False Bottom	505
Design Option 2—Cylindrical Cooler with Manifold	506
Design Option 3—Rectangular Cooler with Manifold.....	507
Design Option 4—Cylindrical Cooler with Braided Ring	508
Design Option 5—Rectangular Cooler with Single Braid Tube.....	509
Design Option 6—Cylindrical Cooler with a T-Screen	510

Appendix F: Lauter Tun Design for Continuous Sparging	513
Fluid Mechanics	514
Lauter Efficiency	516
Lauter Uniformity	517
Factors Affecting Flow	517
Inter-Pipe Spacing.....	517
Wall Spacing.....	519
Grain Bed Depth.....	520
Designing Pipe Manifolds for Continuous Sparging	521
Designing Ring Manifolds for Continuous Sparging	523
Appendix G: Brewing Metallurgy	527
General Information and Cleaning	528
Aluminum.....	528
Copper.....	528
Brass.....	529
Carbon Steel	529
Stainless Steel.....	530
Galvanic Corrosion	531
Soldering, Brazing, and Welding	533
Soldering	533
Brazing	533
Welding.....	534
Toxicity of Metals	534
Aluminum.....	534
Cadmium.....	535
Chromium	535
Copper.....	535
Iron.....	536
Lead.....	536
Zinc.....	536
Appendix H: Metric Conversions	539
Conversion Tables.....	540
Appendix I: The Trouble with Producing Gluten-Free Beer	547
Gluten in Beer.....	548
Prolamins and Beer Haze	549
Enzyme Clarifiers	549
Bibliography	553
Index	561
